Scan me to download catalog

Omega tablets make use of cores based on ARM architecture. ARM architecture processors are one of the most widely used CPU's in the world. They are used in hard disk drives, smartphones. In contrast to the x86 architecture (used in PCs) much lower power consumption and no need for active cooling.

SoC (called system on a chip) is an integrated circuit containing the complete electronic system (in this case the processor based on ARM architecture).

Another very important factor affecting the quality of the tablet is the type of display used in the device.

There are three types of displays:
G + F - plastic, the cheapest and lowest quality protection area
G + P - also plastic, better screen protection
G + G - Glass coating that provides the best protection and quality

Our range of offered screens is very wide, from standard TN panels through IPS to IPS QXGA screens.

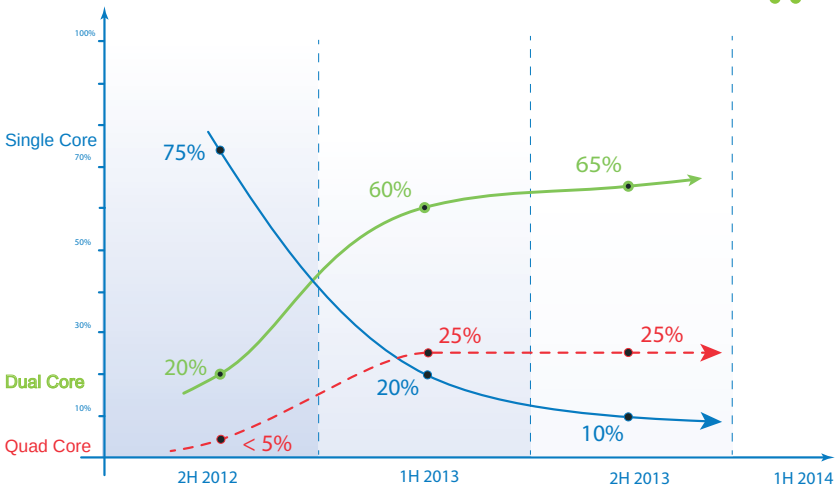
Additionally, in the catalog are given for each model device performance measured by AnTuTu Benchmark, which measures the efficiency of the device applications in key aspects:
• Memory performance • CPU performance • 2D / 3D graphics performance • SD card read / write • Database IO

IPS display (In-Plane Switching) - allows you to view the image without distortions in a much wider angle, also offers a much higher screen brightness, allowing you to use it in the sun without a problem. In addition, highly accurate, high-quality color reproduction in IPS screen is another advantage speaking in favor of this solution.
In the catalog there are available devices based on dual-core processor. The preferred solution is Rockchip 3066 chipset - a dual-core processor clocked at 1.5 GHz on each core. This solution is based on the ARM Cortex A9 architecture –achieving even better performance.

Chipsets used in Omega tablets are:

Single Core	Dual Core	Quad Core
Cortex A9: RK2928, VIA WM8850	Rockchip RK3066	Boxchip A31
Cortex A8: Boxchip A10, Boxchip A13	AMLogic AML8726-MX	

Mobile devices chipset trends for 2013



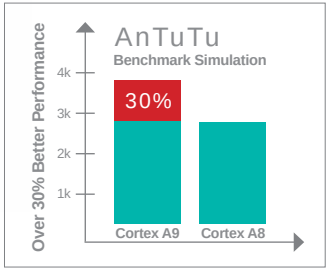
TABLET PC

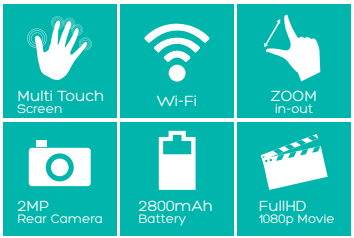
ANDROID 4.0.3
Cortex A9
1.2GHz

7"

Product Features:
- Android 4.0.3
- IPS Capacitive screen with a diagonal 7"(16:9) and 1024x600 resolution; 5 point multi-touch
- Cortex A9 CPU clocked at 1.2GHz
- Mali-400 graphics chipset
- 1 GB RAM DDR3
- 4GB Flash Memory
- Internet connectivity via built-in Wi-Fi (802.11 b / g / n) or an external 3G modem
- Aluminium Case
- Front camera 0.3MP, 2.0MP rear
- Flash Player 11 support
- Decode Full HD 1080P, support all popular video formats
- Connectors: MiniUSB, miniHDMI, microSD card slot (supports cards up to 32GB), 3.5mm audio jack
- Battery capacity of 2800mAh

8,5MM ALUMINIUM CASE
IPS SCREEN 1024 x 600px





TABLET PC

ANDROID 4.0
Cortex A8
1.2GHz

7"

Product Features
- Android 4.0
- Capacitive screen with a diagonal 7"(16:9) and 800x480 resolution; 5 point multi-touch
- Boxchip A13; Cortex A8 CPU clocked at 1.2GHz
- Mali-400 graphics chipset
- 512MB RAM DDR3
- 4GB Flash Memory
- Internet connectivity via built-in Wi-Fi (802.11 b / g / n) or an external 3G modem
- Front camera 0.3MP
- Flash Player 11 support
- Decode Full HD 2160P, 1080P, support all popular video formats
- Connectors: microSD card slot (supports cards up to 32GB), 3.5mm audio jack, power
- Battery capacity of 2800mAh

Ideal for viewing e-mail, the Internet, movies and photos. Capacitive screen in conjunction with the operating system Android 4.0 provides high comfort, built-in webcam enables video conferencing. With access to Wi-Fi and support for all popular video and audio formats the tablet is a powerful portable entertainment center.

MID 7002

JUNIOR TABLET PC

ANDROID 4.0

BLUETOOTH

7"

Product Features
- Android 4.0
- Capacitive screen with a diagonal 7"(16:9) and 800x480 resolution; 5 point multi-touch
- Boxchip A13; Cortex A8 CPU clocked at 1.2GHz
- Mali-400 graphics chipset
- 512MB RAM DDR3
- 4GB Flash Memory
- Internet connectivity via built-in Wi-Fi (802.11 b/g/n) or an external 3G modem
- Bluetooth
- Cameras front 0.3MP, rear 2.0MP
- Flash Player 11 support
- Decode Full HD 2160P, 1080P, support all popular video formats
- Connectors: micro USB port, microSD card slot (supports cards up to 32GB), 3.5mm audio jack, power
- Battery capacity of 3000mAh

The Omega tablet comes pre-loaded with educational content, built-in accelerometer for gaming and a rear camera to help your child capture and cherish memories. It is built with kids in mind, with hard plastic that enables a firm grip and a plastic screen, so it cannot be shattered easily. A portable tablet is also a great way to keep kids entertained on a plane or a long car trip if you're travelling.

TABLET PC

TV ACCESSORIES

USB TV DONGLE ANDROID 4.0

The device's size, which is not much larger than a flash drive, greatly expands the potential of a TV equipped with HDMI.
Based on the latest Android version 4.0 it offers the same functionality as tablets. Built-in Wi-Fi adapter allows you to connect to the network, browse the web, use email, instant messaging, etc.
Built-in USB port lets you connect a keyboard, mouse, webcam, memory stick, hard disk, etc. In addition, the device has a microSD card reader, which enables expansion of the built-in memory by additional 32GB.

DUAL CORE

4GB memory

OUDA

MOUSE AIR 2,4GHZ

Revolutionary wireless mouse, with the technology of reading mouse movement in the air. You can easily control your computer using hand movements. Ideally suited to use computers connected to large TVs (browser support, games, etc.), With built-in keyboard also enables messaging services (eg Skype, Mail etc). In addition, it is dedicated to the Omega TV Dongle.

30m range

OMAIR

From now on your TV may be fully integrated with the Internet! Thanks to our small device you can have constant access to the websites, social network sites, music, movies, weather forecast and many many more.

BLUETOOTH KEYBOARDS

COVER & MICRO USB QWERTY KEYBOARD FOR 7”/9,7”/10,1” TABLETS
